

Healing Through Sound

The Divine Name

A Spiritual Shamanic Ki & Sound Intensive
with Gerald Ressmann (Switzerland)

Fri 08th – Sun 10st November 2024

Mattli Antoniushaus, Morschach, Switzerland

Embark on an enriching journey where ancient sounds unlock doors to healing and personal transformation. "Healing Through Sound - The Divine Name" is a seminar specially designed to immerse you in the world of sound healing practices, with a spotlight on the Divine Name - a sacred sound I have the honor of teaching, thanks to the authorization from Jonathan Goldman. This seminar promises an intimate experience, accessible through personal invitations extended by me or shared within our trusted community.

Jonathan Goldman enlightens us about the Divine Name, illustrating it as a universal sound that, when vocalized, can harmonize and heal individuals and the planet alike. This profound sound, as Goldman reveals, is woven into our DNA and recognized as the personal name of God across various religious traditions. His insights and teachings unveil the Divine Name's vast healing potential and its role in fostering a deeper, universal spiritual connection.

The seminar's scope extends beyond the Divine Name, drawing on a wealth of sound healing practices and insights from my own journey. We will delve into the Taoist Six Healing Sounds, introduce the art of overtone singing, and experience the transformative power of Sacred Peruvian Whistling Vessels. Participants will practice Ki-Breathing and explore the ancient techniques of Jin Shin Jyutsu. Additionally, we will tap into the energies of Saraswati, work with powerful Bija Mantras and new Mudras, discover the relationship between vowels and chakras, and venture into Vedic Chakra Sound Healing.

This seminar is an open invitation to a collective experience, where each participant plays a pivotal role. Together, we will traverse the transformative landscape of sound, engaging with practices that resonate at the core of our being and connect us with the universe. Join us on this voyage, where every note, chant, and vibration is a key to unlocking profound healing and spiritual growth.

While primarily focused on sound, we remain open to the spontaneous guidance of our spirit helpers and the spiritual realm, ready to work in additional fields and areas of energy work as advised.
