- Do what you hear in the **deep pulses** first.
- **How** the blood flows through the vessels - **D**(eep) → arteries, **S**(uperficial) → veins
- If the pulses are not clear → **Smlnt**, then listen again.
- If **S** + **D** are equally intense, e.g. with **LF3**, then **RevIncr 1.Depth** (St, Sp, 14, 9 → long way)
- All four **F2** (Index-Finger) → **4 Flow**
- If almost no pulse can be heard → **Sp**(leen)
- If the **difference** between the two sides is noticeable, especially **S** and **D** → **Mediator Flow** of the full/loud side.
- Right **D** ↑ and left **S** ↓ → **Right Supervisor Flow**
- All **D** pulses on one side → **11/15**; all **S** pulses on one side → **11/25** on that side.
- All **S** and **D** pulses → **11/25, 11/15**
